Fills all fluids in all sizes and kinds of packaging

Fillflex filling machines

A Fillflex can be equipped with a variety of pumps, ejectors, and valves. That way there is always a combination that suits your product and packaging.

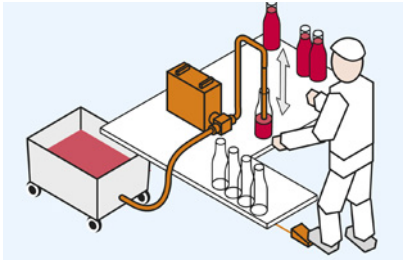

The right machine for your product

- Christian Berner is a cost-effective supplier of the market's best machines for packaging, filling and sealing.
- Long-term cooperation with well-known partners, such as Automated Packaging System, Feige, GSP and Haver & Boecker.

Our job is to find the right packaging machine for your product. This applies to both small tableware and a larger fully automatic machine or line. We mainly focus on you in the food, pharmaceutical, paint and paint industry and chemical / technical industry.

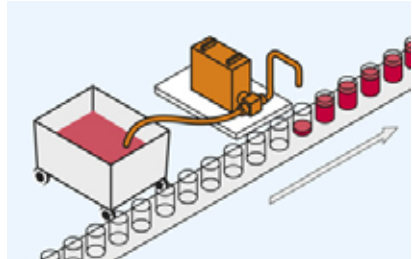

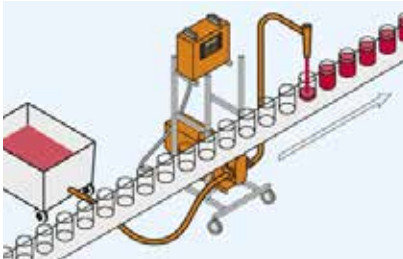

In the fall of 2016, Fillflex AB
was acquired by Christian Berner AB

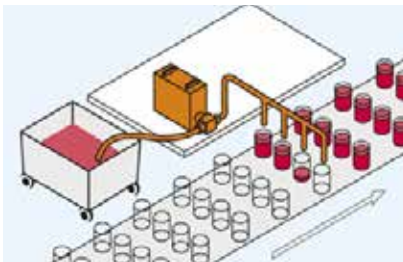

Semi automatic filling

The easiest way to get started with efficient production. The filling sequence is started with a pedal, for instance, and the containers are manually handled.

Fully automatic filling

In a fully automatic filling mode, Fillflex is used as a filling station together with a conveyor band. The Fillflex Compact is prepared for fully automatic operation.

Sequence filling

Get an even higher production capacity from your filling machine. Fillflex Compact Sequence fills up to four containers in a row, one after another, with one single machine.

Duplex filling

Fillflex Duplex has two compartments where you place packaging. Once the first pack is filled, the filler automatically switches to the other and begins to fill.

Simple installation

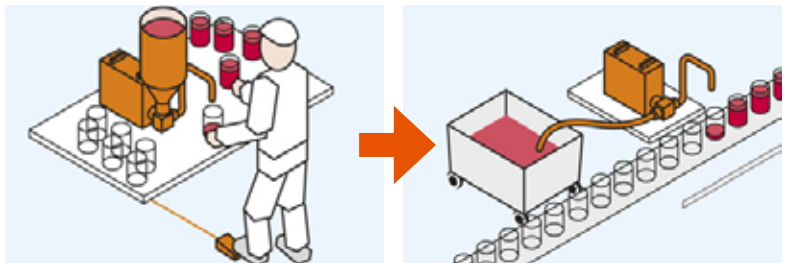

Fillflex Compact features 'plug and play' simplicity:

1. Put in place.
2. Connect outlet pipes and hoses.
3. Connect to an earthed socket.
4. Start!

Simple to adjust

All settings are done at the Fillflex control panel. The operator can easily adjust the filling volume and rate and other settings, even in a comprehensive filling process.

Expand with Fillflex

Fillflex is prepared for fully automatic operation, ready to receive external control impulses from a conveyor. This means that you can use the same machine when your operations expand.

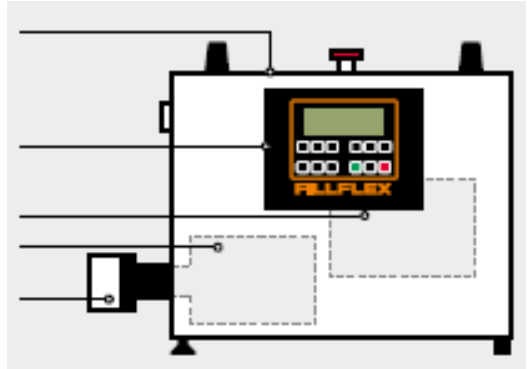

Wide volume range

Use the same filler for small retail-size bottles as well as large wholesale vats. Fillflex controls the whole filling process, down to the last detail.

Simple to clean

A conventional piston filler has many parts to clean – Fillflex just two. The Fillflex pumps are simple to dismantle and clean. Typically without any tools.

Piston
filler to clean:

- piston
- cylinder
- inlet valve
- outlet valve
- valve casing

Fillflex to clean:

- impeller house
- impeller

Simple and robust design

The Fillflex system is based on a simple principle and its own innovative control system – a totally different design from conventional piston fillers.

The complete system for all kinds of filling and depositing

By combining the various filler models with pumps, valves and accessories, Fillflex can solve virtually any filling problem.

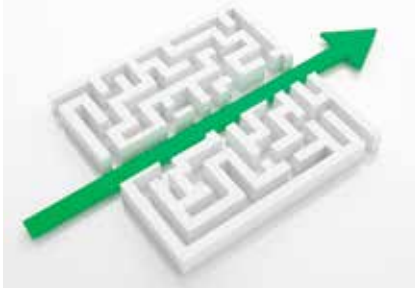

If it can be pumped, Fillflex can fill it

Alkyd oil, degreaser, **dressing**, detergent, paint, lotion,
honey, juice, mincemeat sauce, glue, solvent, mayonnaise,
marmalade, **nose drops**, oil, pâté, potato salad,
grinding paste, salads, shampoo, mustard, jellied veal,
soup, pharmaceuticals, **jam**, brawn, sauces, soap, wine, cleaning agent,
yoghurt, pea soup and many more.

*There is always an ideal
Fillflex combination
for your product, your
packaging and your
business.*

Helping industry with technical solutions, products and services

We seek out top-quality products from leading manufacturers in Europe and the USA.

We collaborate closely with our suppliers and are therefore in the know with regard to product innovations, and since we are familiar with our customers' requirements we can strive to influence manufacturers' development work in a relevant direction.

So we are forging a straighter and faster path to cost-effective production.

Christian Berner Tech Trade AB (publ.)

The operations in the Nordic region come under the parent company Christian Berner Tech Trade AB, which is listed on Nasdaq Stockholm First North.

Net sales for 2015: SEK 450 million

Number of employees: 130

CEO: Bo Söderqvist
